Selecting Your Wireless Backup Service

| Cellular Device with Hotspot Data | Dedicated Mobile Hotspot |
|---|---|
| Advantages <ul style="list-style-type: none">• Works with Android and iPhone• No additional device to purchase• Budget-friendly• Can swap mobile devices in CommandWorx app | Advantages <ul style="list-style-type: none">• Always-on connection• Always at your business• Easy to monitor• Easy to configure in CommandWorx app |
| Considerations <ul style="list-style-type: none">• Must have cellular plan with hotspot data• To provide backup, the designated cellular device must be at the business when the outage occurs• iPhones should be in Maximum Compatibility Mode and Hotspot capability may need toggled off and back on in the event of an outage• Google Pixel devices must run Android software | Considerations <ul style="list-style-type: none">• Additional monthly expense/device expense |

SmartBiz Network Resilience offers:

- Automatic Failover: Switches to a backup cellular or wired connection if your main line goes down, in about 90 seconds.
- Seamless Restoration: Returns to the primary network automatically when stability is restored.
- Real-Time Alerts: Keeps you informed with instant notifications during failover and restoration events.
- Comprehensive Coverage: Protects not just your primary network, but also your Point of Sale and optional Staff and Customer Portal networks.
- Easy Setup: Configure failover settings effortlessly with the intuitive CommandWorx platform.
- Continuous Operations: Ensures your business is always connected, maximizing uptime and productivity.

When connectivity counts for your business, SmartBiz Network Resilience is not just a backup plan—it's an essential component of your business strategy. Keep your doors open to opportunity 24/7 with a network that's as resilient as your ambition.

Don't let unexpected interruptions set you back. Discover the stability and assurance of SmartBiz Network Resilience today, and keep your business constantly connected and protected.
